Power Management Solutions For Every A/V Application!

Drivers written for Crestron & AMX for seamless integration!

\$75
INSTANT REBATE

HTR15-2U Pure Sine Wave Power Management UPS System

- 1500VA/1200W on-line, double-conversion, extended-run UPS
- Pure Sine Wave operation completely isolates connected components from power problems
- EMI/RFI line noise filtration
- IP management for remote access, control and diagnostics capability with email notification

\$40 INSTANT REBATE

A/V Power Play Bundle: HTR05-1U + AV3500PC

- HTR05-1U A/V AVR Series UPS plugs into AV3500PC Isobar® A/V Power Conditioning Center
- 500VA/300W UPS power capacity, 5700-joule surge suppression rating
- Automatic voltage regulation, EMI/FRI noise filtering
- Control integration—drivers written for AMX and Crestron

\$20 INSTANT REBATE

AV550SC Backup Power Block

- Designed for audio/video distribution systems that include a router and modem for IP access, control, and digital content
- Recycle/reset capability prevents modem/router freeze-ups
- 12V DC outputs provide for a cleaner install by reducing the number of bulky transformers
- Many more features!

ELIMINATE Service Calls!
 INCREASE Profitability!

Tripp Lite has Power Management Solutions for Every A/V Application!

Automation Systems • Flat-Panel TVs • A/V Processors
 HD Satellite & Digital Cable Receivers
 Media Center PCs & Servers • And More!

UPS Solutions from 500VA to 20kVA

- A/V On-Line, Pure Sine Wave UPS Systems with zero transfer time—the highest level of power protection available!
- IP remote control, access and diagnostics
- EMI/RFI line noise filtering and surge/spike protection
- Control integration—drivers written for AMX and Crestron
- Extended runtime capability

Surge Suppression and Power Conditioning Centers, including the world's most trusted—the isobar®!

- New 2-outlet design for flat-panel TVs with RJ45 and coax protection
- EMI/RFI line noise filtering and surge/spike protection
- Tel/DSL, coaxial and Ethernet line surge protection options
- Exclusive isolated filter banks, automatic voltage regulation and isolation transformers

Power Distribution Units (PDUs)

- Remote control function for diagnostics, access and control from anywhere in the world
- Outlet control individually reboots products remotely, eliminating costly truck rolls
- Digital current meters help avoid circuit overloads and remotely monitor load conditions
- Programmable sequential power outlets help prevent inrush-related equipment interaction on startup
- Control integration—drivers written for AMX and Crestron

Tripp Lite helps the professional A/V integrator build a solid foundation, save money, go green and offer the very best in customer service!
